

## Maths Coverage 2015-16 ( New Curriculum 2014)

Year Group	
Y1	<p><b>NUMBER</b></p> <p><b>Number and place value</b> Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>count to and across 100, forwards and backwards, beginning with 0 or 1, or from any given number</li> <li>count, read and write numbers to 100 in numerals; count in multiples of twos, fives and tens</li> <li>given a number, identify one more and one less</li> <li>identify and represent numbers using objects and pictorial representations including the number line, and use the language of: equal to, more than, less than (fewer), most, least</li> <li>read and write numbers from 1 to 20 in numerals and words</li> </ul> <p><b>Addition and subtraction</b> Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs</li> </ul> <p>represent and use number bonds and related subtraction facts within 20</p> <ul style="list-style-type: none"> <li>add and subtract one-digit and two-digit numbers to 20, including zero</li> <li>solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as <math>7 = \square - 9</math>.</li> </ul> <p><b>Multiplication and division</b> Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>solve one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher.</li> </ul> <p><b>Fractions</b> Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>recognise, find and name a half as one of two equal parts of an object, shape or quantity</li> <li>recognise, find and name a quarter as one of four equal parts of an object, shape or quantity.</li> </ul> <p><b>MEASUREMENT</b></p>

## Maths Coverage 2015-16 ( New Curriculum 2014)

	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>▪ compare, describe and solve practical problems for:</li> <li>▪ lengths and heights (e.g. long/short, longer/shorter, tall/short, double/half)</li> <li>▪ mass or weight (e.g. heavy/light, heavier than, lighter than)</li> <li>▪ capacity/volume (full/empty, more than, less than, quarter)</li> <li>▪ time (quicker, slower, earlier, later)</li> <li>▪ measure and begin to record the following:</li> <li>▪ lengths and heights</li> <li>▪ mass/weight</li> <li>▪ capacity and volume</li> <li>▪ time (hours, minutes, seconds)</li> <li>▪ recognise and know the value of different denominations of coins and notes</li> <li>▪ sequence events in chronological order using language such as: before and after, next, first, today, yesterday, tomorrow, morning, afternoon and evening <ul style="list-style-type: none"> <li>▪ recognise and use language relating to dates, including days of the week, weeks, months and years</li> </ul> </li> <li>▪ tell the time to the hour and half past the hour and draw the hands on a clock face to show these times.</li> </ul> <p><b>GEOMETRY</b></p> <p><b>Properties of shapes</b></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>▪ recognise and name common 2-D and 3-D shapes, including:</li> <li>▪ 2-D shapes (e.g. rectangles (including squares), circles and triangles)</li> <li>▪ 3-D shapes (e.g. cuboids (including cubes), pyramids and spheres).</li> </ul> <p><b>Position and direction</b></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>▪ describe position, directions and movements, including half, quarter and three-quarter turns</li> </ul>
Y2	<b>NUMBER</b>

## Maths Coverage 2015-16 ( New Curriculum 2014)

### **Number and place value**

Pupils should be taught to:

- count in steps of 2, 3, and 5 from 0, and in tens from any number, forward or backward
- recognise the place value of each digit in a two-digit number (tens, ones)
- identify, represent and estimate numbers using different representations, including the number line
- compare and order numbers from 0 up to 100; use  $<$ ,  $>$  and  $=$  signs
- read and write numbers to at least 100 in numerals and in words
- use place value and number facts to solve problems

### **Addition and subtraction**

Pupils should be taught to:

- solve problems with addition and subtraction:
  - ☐ using concrete objects and pictorial representations, including those involving numbers, quantities and measures
  - ☐ applying their increasing knowledge of mental and written methods
  - ☐ recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100
  - ☐ add and subtract numbers using concrete objects, pictorial representations, and mentally, including:
    - ☐ a two-digit number and ones
    - ☐ a two-digit number and tens
    - ☐ two two-digit numbers
    - ☐ adding three one-digit numbers
  - ☐ show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot
  - ☐ recognise and use the inverse relationship between addition and subtraction and use this to check calculations and missing number problems.

### **Multiplication and division**

Pupils should be taught to:

- recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers
- calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication ( $\times$ ), division ( $\div$ ) and equals ( $=$ ) signs
- show that multiplication of two numbers can be done in any order (commutative) and division of one number by

## Maths Coverage 2015-16 ( New Curriculum 2014)

another cannot

- solve problems involving multiplication and division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts.

### **Fractions**

Pupils should be taught to:

- recognise, find, name and write fractions  $\frac{1}{3}$ ,  $\frac{1}{4}$ ,  $\frac{2}{4}$  and  $\frac{3}{4}$  of a length, shape, set of objects or quantity
- write simple fractions e.g.  $\frac{1}{2}$  of 6 = 3 and recognise the equivalence of  $\frac{2}{4}$  and  $\frac{1}{2}$ .

### **MEASUREMENT**

Pupils should be taught to:

- choose and use appropriate standard units to estimate and measure length/height in any direction (m/cm); mass (kg/g); temperature ( $^{\circ}\text{C}$ ); capacity (litres/ml) to the nearest appropriate unit, using rulers, scales, thermometers and measuring vessels
- compare and order lengths, mass, volume/capacity and record the results using  $>$ ,  $<$  and  $=$
- recognise and use symbols for pounds (£) and pence (p); combine amounts to make a particular value
- find different combinations of coins that equal the same amounts of money
- solve simple problems in a practical context involving addition and subtraction of money of the same unit, including giving change
- compare and sequence intervals of time
- tell and write the time to five minutes, including quarter past/to the hour and draw the hands on a clock face to show these times.

### **GEOMETRY**

#### **Properties of shapes**

Pupils should be taught to:

- identify and describe the properties of 2-D shapes, including the number of sides and symmetry in a vertical line
- identify and describe the properties of 3-D shapes, including the number of edges, vertices and faces
- identify 2-D shapes on the surface of 3-D shapes, for example a circle on a cylinder and a triangle on a pyramid
- compare and sort common 2-D and 3-D shapes and everyday objects.

#### **Position and direction**

## Maths Coverage 2015-16 ( New Curriculum 2014)

	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>▪ order and arrange combinations of mathematical objects in patterns</li> <li>▪ use mathematical vocabulary to describe position, direction and movement including distinguishing between rotation as a turn and in terms of right angles for quarter, half and three-quarter turns (clockwise and anti-clockwise), and movement in a straight line.</li> </ul> <p><b>STATISTICS</b></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>▪ interpret and construct simple pictograms, tally charts, block diagrams and simple tables</li> <li>▪ ask and answer simple questions by counting the number of objects in each category and sorting the categories by quantity</li> <li>▪ ask and answer questions about totalling and comparing categorical data.</li> </ul>
Y3	<p><b>NUMBER</b></p> <p><b>Number and place value</b></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>▪ count from 0 in multiples of 4, 8, 50 and 100; find 10 or 100 more or less than a given number</li> <li>▪ recognise the place value of each digit in a three-digit number (hundreds, tens, ones)</li> <li>▪ compare and order numbers up to 1000</li> <li>▪ identify, represent and estimate numbers using different representations</li> <li>▪ read and write numbers up to 1000 in numerals and in words</li> <li>▪ solve number problems and practical problems involving these ideas.</li> </ul> <p><b>Addition and subtraction</b></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>▪ add and subtract numbers mentally, including:             <ul style="list-style-type: none"> <li>▪ a three-digit number and ones</li> <li>▪ a three-digit number and tens</li> </ul> </li> <li>□ a three-digit number and hundreds</li> <li>□ add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction</li> </ul>

## Maths Coverage 2015-16 ( New Curriculum 2014)

- estimate the answer to a calculation and use inverse operations to check answers
- solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction.

### **Multiplication and division**

Pupils should be taught to:

- recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables
- write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods
- solve problems, including missing number problems, involving multiplication and division, including integer scaling problems and correspondence problems in which  $n$  objects are connected to  $m$  objects.

### **Fractions**

Pupils should be taught to:

- count up and down in tenths; recognise that tenths arise from dividing an object into 10 equal parts and in dividing one-digit numbers or quantities by 10
- recognise, find and write fractions of a discrete set of objects: unit fractions and non-unit fractions with small denominators
- recognise and use fractions as numbers: unit fractions and non-unit fractions with small denominators
- recognise and show, using diagrams, equivalent fractions with small denominators
- add and subtract fractions with the same denominator within one whole (e.g.  $\frac{5}{7} + \frac{1}{7} = \frac{6}{7}$ )
- compare and order unit fractions, and fractions with the same denominators
- solve problems that involve all of the above.

### **MEASUREMENT**

## Maths Coverage 2015-16 ( New Curriculum 2014)

	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>▪ measure, compare, add and subtract: lengths (m/cm/mm); mass (kg/g); volume/capacity (l/ml)</li> <li>▪ measure the perimeter of simple 2-D shapes</li> <li>▪ add and subtract amounts of money to give change, using both £ and p in practical contexts</li> <li>▪ tell and write the time from an analogue clock, including using Roman numerals from I to XII, and 12-hour and 24-hour clocks</li> <li>▪ estimate and read time with increasing accuracy to the nearest minute; record and compare time in terms of seconds, minutes, hours and o'clock; use vocabulary such as a.m./p.m., morning, afternoon, noon and midnight</li> <li>▪ know the number of seconds in a minute and the number of days in each month, year and leap year</li> <li>▪ compare durations of events, for example to calculate the time taken by particular events or tasks.</li> </ul> <p><b>GEOMETRY</b></p> <p><b>Properties of shapes</b></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>▪ draw 2-D shapes and make 3-D shapes using modelling materials; recognise 3-D shapes in different orientations and describe them</li> <li>▪ recognise that angles are a property of shape or a description of a turn</li> <li>▪ identify right angles, recognise that two right angles make a half-turn, three make three quarters of a turn and four a complete turn; identify whether angles are greater than or less than a right angle</li> <li>▪ identify horizontal and vertical lines and pairs of perpendicular and parallel lines.</li> </ul> <p><b>STATISTICS</b></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>▪ interpret and present data using bar charts, pictograms and tables</li> <li>▪ solve one-step and two-step questions such as 'How many more?' and 'How many fewer?' using information presented in scaled bar charts and pictograms and tables</li> </ul>
Y4	<b>NUMBER</b>

## Maths Coverage 2015-16 ( New Curriculum 2014)

### **Number and place value**

Pupils should be taught to

- count in multiples of 6, 7, 9, 25 and 1000
- find 1000 more or less than a given number
- count backwards through zero to include negative numbers
- recognise the place value of each digit in a four-digit number (thousands, hundreds, tens, and ones)
- order and compare numbers beyond 1000
- identify, represent and estimate numbers using different representations
- round any number to the nearest 10, 100 or 1000
- solve number and practical problems that involve all of the above and with increasingly large positive numbers
- read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value.

### **Addition and subtraction**

Pupils should be taught to:

- add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate
- estimate and use inverse operations to check answers to a calculation
- solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why.

### **Multiplication and division**

Pupils should be taught to:

- recall multiplication and division facts for multiplication tables up to  $12 \times 12$
- use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers
- recognise and use factor pairs and commutativity in mental calculations
- multiply two-digit and three-digit numbers by a one-digit number using formal written layout
- solve problems involving multiplying and adding, including using the distributive law to multiply two digit numbers by one digit, integer scaling problems and harder correspondence problems such as  $n$  objects are connected to  $m$  objects.

### **Fractions (including decimals)**

Pupils should be taught to:

## Maths Coverage 2015-16 ( New Curriculum 2014)

- recognise and show, using diagrams, families of common equivalent fractions
- count up and down in hundredths; recognise that hundredths arise when dividing an object by a hundred and dividing tenths by ten.
- solve problems involving increasingly harder fractions to calculate quantities, and fractions to divide quantities, including non-unit fractions where the answer is a whole number
- add and subtract fractions with the same denominator
- recognise and write decimal equivalents of any number of tenths or hundredths
- recognise and write decimal equivalents to  $\frac{1}{4}$ ;  $\frac{1}{2}$ ;  $\frac{3}{4}$ 
  - find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer as units, tenths and hundredths
- round decimals with one decimal place to the nearest whole number
- compare numbers with the same number of decimal places up to two decimal places
- solve simple measure and money problems involving fractions and decimals to two decimal places.

### **MEASUREMENT**

Pupils should be taught to:

- Convert between different units of measure (e.g. kilometre to metre; hour to minute)
- measure and calculate the perimeter of a rectilinear figure (including squares) in centimetres and metres
- find the area of rectilinear shapes by counting squares
- estimate, compare and calculate different measures, including money in pounds and pence
- read, write and convert time between analogue and digital 12 and 24-hour clocks
- solve problems involving converting from hours to minutes; minutes to seconds; years to months; weeks to days.

### **GEOMETRY**

## Maths Coverage 2015-16 ( New Curriculum 2014)

	<p><b>Properties of shapes</b> Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes</li> <li>identify acute and obtuse angles and compare and order angles up to two right angles by size</li> <li>identify lines of symmetry in 2-D shapes presented in different orientations</li> <li>complete a simple symmetric figure with respect to a specific line of symmetry</li> </ul> <p><b>Position and direction</b> Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>describe positions on a 2-D grid as coordinates in the first quadrant</li> <li>describe movements between positions as translations of a given unit to the left/right and up/down</li> <li>plot specified points and draw sides to complete a given polygon.</li> </ul> <p><b>STATISTICS</b> Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>interpret and present discrete and continuous data using appropriate graphical methods, including bar charts and time graphs</li> <li>solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables and other graphs.</li> </ul>				
Y5	<table style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 50%; text-align: left; padding-bottom: 5px;"><b>NUMBER</b></th> <th style="width: 50%; text-align: right; padding-bottom: 5px;"><b>NUMBER</b></th> </tr> </thead> <tbody> <tr> <td style="vertical-align: top; padding: 5px;"> <p><b>Number and place value</b> Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>read, write, order and compare numbers to at least 1 000 000 and determine the value of each digit</li> <li>count forwards or backwards in steps of powers of 10 for any given number up to 1 000 000</li> <li>interpret negative numbers in context, count forwards and backwards with positive and negative whole numbers through zero</li> <li>round any number up to 1 000 000 to the nearest 10, 100, 1000, 10 000 and 100 000</li> <li>solve number problems and practical problems that involve all of the above</li> <li>read Roman numerals to 1000 (M) and recognise years written in Roman numerals</li> </ul> <p><b>Addition and subtraction</b> Pupils should be taught to:</p> </td> <td style="vertical-align: top; padding: 5px;"></td> </tr> </tbody> </table>	<b>NUMBER</b>	<b>NUMBER</b>	<p><b>Number and place value</b> Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>read, write, order and compare numbers to at least 1 000 000 and determine the value of each digit</li> <li>count forwards or backwards in steps of powers of 10 for any given number up to 1 000 000</li> <li>interpret negative numbers in context, count forwards and backwards with positive and negative whole numbers through zero</li> <li>round any number up to 1 000 000 to the nearest 10, 100, 1000, 10 000 and 100 000</li> <li>solve number problems and practical problems that involve all of the above</li> <li>read Roman numerals to 1000 (M) and recognise years written in Roman numerals</li> </ul> <p><b>Addition and subtraction</b> Pupils should be taught to:</p>	
<b>NUMBER</b>	<b>NUMBER</b>				
<p><b>Number and place value</b> Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>read, write, order and compare numbers to at least 1 000 000 and determine the value of each digit</li> <li>count forwards or backwards in steps of powers of 10 for any given number up to 1 000 000</li> <li>interpret negative numbers in context, count forwards and backwards with positive and negative whole numbers through zero</li> <li>round any number up to 1 000 000 to the nearest 10, 100, 1000, 10 000 and 100 000</li> <li>solve number problems and practical problems that involve all of the above</li> <li>read Roman numerals to 1000 (M) and recognise years written in Roman numerals</li> </ul> <p><b>Addition and subtraction</b> Pupils should be taught to:</p>					

## Maths Coverage 2015-16 ( New Curriculum 2014)

- add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction)
- add and subtract numbers mentally with increasingly large numbers
- use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy
- solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why.

### **Multiplication and division**

Pupils should be taught to:

- identify multiples and factors, including finding all factor pairs of a number, and common factors of two numbers.
- solve problems involving multiplication and division where larger numbers are used by decomposing them into their factors
- know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers
- establish whether a number up to 100 is prime and recall prime numbers up to 19
- multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers
- multiply and divide numbers mentally drawing upon known facts
- divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context
- multiply and divide whole numbers and those involving decimals by 10, 100 and 1000
- recognise and use square numbers and cube numbers, and the notation for squared ( $^2$ ) and cubed ( $^3$ )
- solve problems involving addition, subtraction, multiplication and division and a combination of these, including understanding the meaning of the equals sign
- solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates

### **Fractions (including decimals and percentages)**

Pupils should be taught to:

- compare and order fractions whose denominators are all multiples of the same number
- identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths
- recognise mixed numbers and improper fractions and

## Maths Coverage 2015-16 ( New Curriculum 2014)

convert from one form to the other and write mathematical statements  $> 1$  as a mixed number (e.g.  $\frac{2}{5} + \frac{4}{5} = \frac{6}{5} = 1\frac{1}{5}$ )

- add and subtract fractions with the same denominator and multiples of the same number
- multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams
- read and write decimal numbers as fractions (e.g.  $0.71 = \frac{71}{100}$ )
- recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents
- round decimals with two decimal places to the nearest whole number and to one decimal place
- read, write, order and compare numbers with up to three decimal places
- solve problems involving number up to three decimal places
- recognise the per cent symbol (%) and understand that per cent relates to “number of parts per hundred”, and write percentages as a fraction with denominator hundred, and as a decimal fraction
- solve problems which require knowing percentage and decimal equivalents of  $\frac{1}{2}, \frac{1}{4}, \frac{1}{5}, \frac{2}{5}, \frac{4}{5}$  and those with a denominator of a multiple of 10 or 25.

### **MEASUREMENT**

Pupils should be taught to:

- convert between different units of metric measure (e.g. kilometre and metre; centimetre and metre; centimetre and millimetre; gram and kilogram; litre and millilitre)
- understand and use equivalences between metric units and common imperial units such as inches, pounds and pints
- measure and calculate the perimeter of composite rectilinear shapes in centimetres and metres
- calculate and compare the area of squares and rectangles including using standard units, square centimetres ( $\text{cm}^2$ ) and square metres ( $\text{m}^2$ ) and estimate the area of irregular shapes
- estimate volume (e.g. using  $1 \text{ cm}^3$  blocks to build cubes and cuboids) and capacity (e.g. using water)
- solve problems involving converting between units of time
- use all four operations to solve problems involving measure (e.g. length, mass, volume, money) using decimal notation including scaling.

### **GEOMETRY**

## Maths Coverage 2015-16 ( New Curriculum 2014)

	<p><b>Properties of shapes</b> Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>▪ identify 3-D shapes, including cubes and other cuboids, from 2-D representations</li> <li>▪ know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles</li> <li>▪ draw given angles, and measure them in degrees (<math>^{\circ}</math>)</li> <li>▪ identify: <ul style="list-style-type: none"> <li>▪ angles at a point and one whole turn (total <math>360^{\circ}</math>)</li> <li>▪ angles at a point on a straight line and <math>\frac{1}{2}</math> a turn (total <math>180^{\circ}</math>)</li> <li>▪ other multiples of <math>90^{\circ}</math></li> </ul> </li> <li>□ use the properties of rectangles to deduce related facts and find missing lengths and angles</li> <li>□ distinguish between regular and irregular polygons based on reasoning about equal sides and angles.</li> </ul> <p><b>Position and direction</b> Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>▪ identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed.</li> </ul> <p><b>STATISTICS</b> Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>▪ solve comparison, sum and difference problems using information presented in a line graph</li> <li>▪ complete, read and interpret information in tables, including timetables.</li> </ul>
Y6	<div style="display: flex; justify-content: space-between;"> <span><b>NUMBER</b></span> <span><b>NUMBER</b></span> </div>

## Maths Coverage 2015-16 ( New Curriculum 2014)

### **Number and place value**

Pupils should be taught to:

- read, write, order and compare numbers up to 10 000 000 and determine the value of each digit
- round any whole number to a required degree of accuracy
- use negative numbers in context, and calculate intervals across zero
- solve number and practical problems that involve all of the above.

### **Addition, subtraction, multiplication and division**

Pupils should be taught to:

- multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication
- divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context
- perform mental calculations, including with mixed operations and large numbers.
- identify common factors, common multiples and prime numbers
- use their knowledge of the order of operations to carry out calculations involving the four operations
- solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why
- solve problems involving addition, subtraction, multiplication and division
- use estimation to check answers to calculations and determine, in the context of a problem, levels of accuracy.

### **Fractions (including decimals and percentages)**

Pupils should be taught to:

- use common factors to simplify fractions; use common multiples to express fractions in the same denomination
- compare and order fractions, including fractions  $>1$
- add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions
- multiply simple pairs of proper fractions, writing the answer in its simplest form (e.g.  $\frac{1}{4} \times \frac{1}{2} = \frac{1}{8}$ )
- divide proper fractions by whole numbers (e.g.  $\frac{1}{3} \div 2 = \frac{1}{6}$ )
- associate a fraction with division and calculate decimal fraction equivalents (e.g. 0.375) for a simple fraction (e.g.  $\frac{3}{8}$ )
- identify the value of each digit to three decimal places and multiply and divide numbers by 10, 100 and 1000 where

## Maths Coverage 2015-16 ( New Curriculum 2014)

the answers are up to three decimal places

- multiply one-digit numbers with up to two decimal places by whole numbers
- use written division methods in cases where the answer has up to two decimal places
- solve problems which require answers to be rounded to specified degrees of accuracy
- recall and use equivalences between simple fractions, decimals and percentages, including in different contexts.

### **RATIO AND PROPORTION**

Pupils should be taught to:

- solve problems involving the relative sizes of two quantities where missing values can be found by using integer multiplication and division facts
- solve problems involving the calculation of percentages (e.g. of measures) such as 15% of 360 and the use of percentages for comparison
- solve problems involving similar shapes where the scale factor is known or can be found
- solve problems involving unequal sharing and grouping using knowledge of fractions and multiples.

### **ALGEBRA**

Pupils should be taught to:

- express missing number problems algebraically
- use simple formulae expressed in words

- generate and describe linear number sequences
- find pairs of numbers that satisfy number sentences involving two unknowns
- enumerate all possibilities of combinations of two variables.

### **MEASUREMENT**

## Maths Coverage 2015-16 ( New Curriculum 2014)

	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>▪ solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate</li> <li>▪ use, read, write and convert between standard units, converting measurements of length, mass, volume and time from a smaller unit of measure to a larger unit, and vice versa, using decimal notation to up to three decimal places</li> <li>▪ convert between miles and kilometres</li> <li>▪ recognise that shapes with the same areas can have different perimeters and vice versa</li> <li>▪ recognise when it is possible to use formulae for area and volume of shapes</li> <li>▪ calculate the area of parallelograms and triangles</li> <li>▪ calculate, estimate and compare volume of cubes and cuboids using standard units, including centimetre cubed (<math>\text{cm}^3</math>) and cubic metres (<math>\text{m}^3</math>), and extending to other units</li> </ul> <p><b>GEOMETRY</b></p> <p><b>Properties of shapes</b></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>▪ draw 2-D shapes using given dimensions and angles</li> <li>▪ recognise, describe and build simple 3-D shapes, including making nets</li> <li>▪ compare and classify geometric shapes based on their properties and sizes and find unknown angles in any triangles, quadrilaterals, and regular polygons</li> <li>▪ illustrate and name parts of circles, including radius, diameter and circumference and know that the diameter is twice the radius</li> <li>▪ recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles.</li> </ul> <p><b>Position and direction</b></p> <p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>▪ describe positions on the full coordinate grid (all four quadrants)</li> <li>▪ draw and translate simple shapes on the coordinate plane, and reflect them in the axes.</li> </ul> <p><b>STATISTICS</b></p>
--	--

### Maths Coverage 2015-16 ( New Curriculum 2014)

	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"><li>▪ interpret and construct pie charts and line graphs and use these to solve problems</li><li>▪ calculate and interpret the mean as an average.</li></ul>
